

Elite

Knockdown

foam control agent

Premium performance made possible.

Get quicker and longer foam control with Elite Knockdown.

Our high-performance foam control agent provides superior initial foam control and maintains foam control properties longer than other silicone antifoams.

Adding Elite Knockdown to a pesticide application is guaranteed to improve the results.

- o Designed for effective use with most surfactants in aqueous formulations, particularly effective with nonionic surfactants.
- o Can be evenly dispersed in water-based agricultural formulations and surfactant concentrates, yielding mixtures with excellent storage stability.
- o Effective in many agricultural applications as a foam control agent for pesticides, during production, packaging and spray tank operations.
- o Can be used at lower use levels than conventional silicone antifoams.

Results you can expect:

- o Provides excellent foam control over a broad pH range, over a longer period.
- o Maintains high performance even after 60 minutes of agitation, while larger concentrations of standard antifoam agents begin losing activity after 15 minutes.
- o Offers improved compatibility with many adjuvants and "in-can" pesticide formulations, remaining homogeneously dispersed for greater than two months, while typical foam control agents show significant signs of separation after a few days.

Elite Knockdown is brought to you by Red River Specialties, LLC., your premier provider of herbicides in the industrial, rights-of-way, aquatic, range and pasture, and forestry markets.

Elite

Knockdown

foam control agent

Premium performance made possible.

Antifoam Efficiency in 2.5% Glyphosate Formulation

Note: Test data. Actual results may vary.

Use Rates

Suggested starting concentrations are 1/4 oz. to 1/2 oz. per 300 - 500 gallons.

NOTE: Effectiveness will depend upon composition of spray mixture, temperature, etc. Adjust Elite Knockdown foam control agent concentration as necessary to achieve desired foam control.

Mixing Instructions

A recommended starting point is addition of Elite Knockdown to give between 1 ppm and 50 ppm of antifoam (based on % solids) into the final foaming formulation.

Package Sizes

16 oz bottle
