

# RANGE & PASTURE

The use of herbicides provides an effective and efficient alternative for controlling brush and weeds in range and pasture settings. Red River Specialties has a broad portfolio of products that not only give optimum benefits to livestock, but also to wildlife. Red River can ensure that the herbicides you use are properly applied, effective and safe. The experienced representatives of Red River Specialties can supply the products and services that are needed by dealers, customers and growers alike.

Timing is critical in getting the job done right. Our superior service delivers the correct product when you need it, ensuring an accurate and timely application. To locate your nearest representative please visit [www.rrsi.com](http://www.rrsi.com). Red River Specialties welcomes the opportunity to assist in making your program successful.

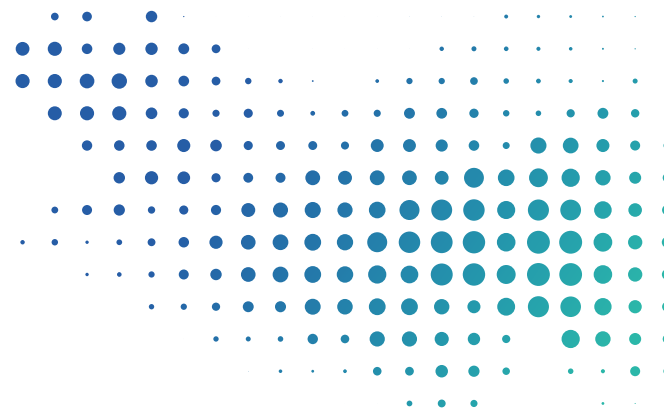

## HEADQUARTERS

1324 N. Hearne Ave., Ste 120  
Shreveport, LA 71107

Customers choose Red River Specialties, Inc. as a single resource to purchase everything they need. Since we distribute herbicides in the aquatics, forestry, industrial, range and pasture, and rights-of-way markets, we offer our customers a one-stop shop for purchasing products. Several of our customers came to us because they were frustrated with the lack of attention and technical advice they were receiving. Red River Specialties provides customers with expert advisors nationwide, plus over 12 warehouses to ensure you receive product quickly. We understand the importance of products being available when you need them. As the premier provider of herbicides, our goal is to provide unparalleled customer service.

Whatever your market segment requirements may be, your local Red River Specialties representative is always available to assist you in getting the job done right. Count on Red River Specialties to go above and beyond. We want your business and are willing to earn it.

creating value,  
growing together

# AQUATICS

Nuisance aquatic vegetation management is essential for all bodies of water. If vegetation is not treated with herbicide, fish and other wildlife can be harmed, recreational access can be limited or eliminated, and flow rates can be restricted into canals and rivers. Red River Specialties can assist customers in keeping waters in their area clear of nuisance vegetation. Solving complex weed problems is frustrating for many people. By working with a Red River specialist, customers will receive assistance identifying the aquatic weed and creating a program to treat problem areas.

# FORESTRY

The forestry business requires access to a wide range of products and services. Red River Specialties' longstanding relationships with applicators provide a trouble-free service for our customers. Red River Specialties is known throughout the industry for providing exceptional air and ground turnkey application services. Customers who have had poor performance or non-efficient weed control in the past now trust Red River to handle all their herbicide needs. Our experience and ability to get a project done is what make us industry leaders.

As an authorized distributor for every major forestry herbicide manufacturer, we offer professional, sitespecific herbicide prescriptions. The Red River Specialties forestry experts can implement the following programs for you:

- Herbaceous Weed Control
- Pine Release
- Site Preparation

# VEGETATION

The industrial vegetation management market covers a broad range of applications. Customers that need expert advisors can count on Red River Specialties' representatives to assist in-house programs or help create custom application programs. We can recommend the correct product for the job or direct your program to a quality applicator. Red River Specialties is a full-line vegetation management distributor. Superior service will assure your herbicide program is not delayed. We have the products necessary to control weeds.

Our vegetation managers have expert knowledge in the following programs:

- Utility and Pipeline Right-of-Way
- Utility Substations
- Roadside Right-of-Way
- Drainage Canals
- Plant Sites
- Railroads
- Noxious Weed
- Invasive Species
