Introducing ForeFront® HL Herbicide

The most complete broadleaf weed solution for range and pasture.

Simplify pasture management with new ForeFront® HL herbicide, a broad-spectrum weed control solution that’s convenient to use. ForeFront HL provides season-long performance on over 60 species of broadleaf weeds to help you get the job done effectively and efficiently. Because it is so complete, there’s no need to tank-mix ForeFront HL with another product to pick up a specific tough weed. Plus, most states require no applicator’s license for purchase or application (2,4-D state restrictions apply),¹ and it has no livestock grazing restrictions.² ForeFront HL is everything you want in a range and pasture herbicide.

Superior, broad-spectrum broadleaf weed control.

Advanced chemistry premixed with the familiar standards adds up to thorough control. One of the active ingredients in ForeFront HL – aminopyralid – controls weeds like nothing you’ve seen before. The other – 2,4-D – is a proven weapon against many broadleaf weeds. Together, this dual chemistry controls nearly all problem annual and perennial broadleaf weeds, including Canada thistle, biennial thistles such as musk and plumeless thistles, horsenettle and ironweed.

New ForeFront® HL herbicide controls over 60 key broadleaf weeds, including:

- Annual broomweed
- Bitter sneezeweed
- Bull thistle
- Buttercup
- Canada thistle
- Chicory
- Cocklebur
- Common burdock
- Common chickweed
- Common sunflower
- Curly dock
- Goldenrod
- Henbit
- Horsenettle
- Horseweed/marestail
- Ironweed
- Marshelder/sumpweed
- Mexican tea
- Musk thistle
- Nightshades
- Plantain
- Plumeless thistle
- Ragweeds
- Spiny amaranth
- Teasel
- Tropical soda apple
- Vervain
- Vetch
- Wild carrot
- Woolly croton

Refer to the product label for a complete list of weeds controlled.

Season-long performance.

With its systemic mode of action and residual activity, one application of new ForeFront® HL has a lasting effect on rangeland and pastures. When applied, ForeFront HL penetrates into foliage and moves quickly throughout the entire target plant, going deep into the root system. Because it is
readily translocated, ForeFront HL controls the entire plant, not just the part above ground.

In addition to translocating throughout emerged plants, ForeFront HL provides season-long soil residual control of emerging broadleaf weeds. This fast, long-lasting activity extends the impact of weed control and improves forage response.

Grass management made simple.

Because it gives you the broadest spectrum of weed control available without an applicator’s license, ForeFront HL herbicide saves you time. It contains aminopyralid, a novel active ingredient reviewed and registered under the Reduced Risk Pesticide Initiative of the U.S. Environmental Protection Agency. This program is reserved for compounds that demonstrate less risk to humans and the environment than the market standards. ForeFront HL also contains 2,4-D, a trusted broadleaf herbicide popular since it was introduced in the 1940s.

With its broad spectrum of control, ForeFront HL provides everything you need for broadleaf weed control without tank-mixing. To add brush control, ForeFront HL may be tank-mixed with PastureGard® HL, Surmount® or Remedy Ultra® herbicide.

- ForeFront HL simplifies grass management in many ways:
  - Season-long performance
  - No applicator’s license required
  - Controls over 60 broadleaf weeds without tank-mixing
  - Easily compatible with brush herbicides
  - Can be tank-mixed with liquid fertilizer
  - Wide window of application, extending through the fall
  - Flexible rates (1.2 to 2.1 pints/acre), depending on target weeds
  - Applied aerially or by ground in broadcast or spot treatments
  - No livestock grazing restrictions

Fewer weeds = more grass = more beef.

ForeFront HL herbicide is safe to desirable grasses and, by eliminating weed competition, actually helps you grow more, higher-quality forage. This increases carrying capacity. With ForeFront HL, you can have fewer weeds, more grass and more beef. Use ForeFront HL to improve your land, whether it’s for livestock, private hunting grounds or wildlife habitat.

For more information on new ForeFront HL herbicide, contact your Dow AgroSciences Range & Pasture Specialist or visit www.rangeandpasture.com.

1Some states require an individual be licensed if involved in the recommendation, handling or application of any pesticide. Consult your local extension office for information regarding licensing requirements.

2Restrictions do apply to the transfer of grazing animals to sites intended to grow sensitive crops. Refer to the label for a complete list of transfer restrictions.
